

Every major AI model. One private space.

OpenAI, Claude, Gemini, Mistral, DeepSeek and xAI — together in a governed workspace, on one subscription and one bill.

WHAT YOU CAN DO

- ✓ **Multi-model, one subscription.** Switch models in one click, mid-conversation, without losing the thread.
- ✓ **Keyboard shortcuts.** “/” for your tools, skills and connectors, “#” for your knowledge bases.
- ✓ **Files and audio.** Attach documents or dictate — audio is transcribed right in the chat.
- ✓ **Folders and team projects.** Organize conversations and share knowledge and instructions by project.
- ✓ **Interactive artifacts.** Code, tables and generated content, ready to copy or export.
- ✓ **Governed sharing.** Share a conversation via a controlled link; admins keep the full picture.

HOW IT WORKS

- 1 Ask your question**
In your HiloIntelligence workspace, in plain language.
- 2 You pick the model**
Six providers in one menu; if one goes down, the handover is automatic.
- 3 Work as a team**
Folders, shared projects, common knowledge and instructions.
- 4 Share with confidence**
Governed link, controlled access, full visibility for admins.

- 6 providers, 1 subscription
- One-click model switching
- End-to-end governance
- Installed and operated by Hilo Tech

✓ Your conversations stay inside your governed workspace — access, sharing and retention controlled by your organization.
