

Your documents, understood by AI.

Create knowledge bases, upload your documents and query them in plain language — RAG finds the right passages, in files up to 512 MB.

WHAT YOU CAN DO

- ✓ **Knowledge bases (RAG).** Contracts, policies and documentation in searchable collections, cited by the AI.
- ✓ **Files up to 512 MB.** Annual reports, technical specs, complete case files — 1,000 documents per base, ceilings raisable on your instance.
- ✓ **Collaborative editor.** Write together in real time, with AI at your side: reformulate, shorten, expand, translate.
- ✓ **PDF tools.** Merge, split, convert and sign your PDFs — forms and version history included.
- ✓ **Office conversion.** Office files, Word templates, Visio diagrams (VSDX) — and document translation.
- ✓ **Built-in OCR.** Scanned documents and images go through OCR: their content becomes searchable.

HOW IT WORKS

- 1 Upload your documents**
Word, Excel, PowerPoint, PDF (scanned included, OCR), HTML, CSV, Markdown or code.
- 2 Chunking respects structure**
Headings, tables and sections stay intact, with no context cut off.
- 3 Ask your question**
In plain language, like asking a colleague who read everything.
- 4 The answer cites its source**
The exact document and passage, verifiable in one click.

- RAG or full context, your choice

- Cited answers, verifiable passage by passage

- Governed sharing, base by base

- Installed and hosted by Hilo Tech

✓ Your documents stay inside your governed instance — access, sharing and retention controlled by your organization.

See retrieval-augmented search in action.
