

Train your teams on AI, in the same platform.

Courses, paths and certificates to master AI at work — with a studio where AI turns your own content into training.

WHAT YOU CAN DO

- ✓ **Courses and ordered paths.** Structure skill-building into courses, then into paths whose order you set.
- ✓ **AI generation.** The studio turns your documents into structured courses, ready to review.
- ✓ **Graded quizzes.** One quiz per course checks understanding before counting it as complete.
- ✓ **Numbered certificates.** Every pass issues a dated, numbered certificate tied to the course version.
- ✓ **Policy courses.** Publish your AI usage policies as a course staff must acknowledge.
- ✓ **Completion tracking.** Progress, completion and certificates visible course by course and person by person.

HOW IT WORKS

- 1 Pick a course**
From the catalog, or follow a published path — some courses can be required before AI unlocks.
- 2 Work through the lessons**
Short lessons, with a graded quiz at the end of the course.
- 3 Earn the certificate**
Issued automatically when you pass the course.
- 4 Managers track adoption**
Completion reports, course by course and person by person.

- LMS built into the platform

- AI-generated courses

- Seats independent of AI plans

- Installed and operated by Hilo Tech

✓ Your training content stays inside your governed workspace — access and progress visible to your admins only.
