

Your whole Microsoft estate, one governed AI.

Entra identity, Outlook mail and calendar, OneDrive and SharePoint files, Teams conversations — connected with permissions set à la carte, family by family.

WHAT YOU CAN DO

- ✓ **Unified search.** One question searches mail, calendar and files at once; Teams is added from the service picker.
- ✓ **Mail, calendar, contacts and tasks.** Summarize a thread, draft a reply, find a time slot; Outlook contacts and Microsoft To Do included.
- ✓ **OneDrive and SharePoint files.** Word, Excel, PowerPoint and PDF read and understood with no download.
- ✓ **Teams conversations.** Find a decision buried in a channel or a chat.
- ✓ **AI panes inside Office.** Outlook, Word, Excel and PowerPoint: read, write, compute and design without leaving the file.
- ✓ **Single Entra sign-in.** Your employees sign in with their existing Microsoft 365 identity.

HOW IT WORKS

- 1 Entra connection**
Admin consent through the standard Microsoft screen.
- 2 Permissions by family**
Off, read, or read-write — mail, files, Teams, and more.
- 3 Everyone signs in**
With the Microsoft 365 identity your employees already use.
- 4 AI works in context**
Answers grounded in your real data, sources cited.

- Permissions by family, never blanket access

- Files never copied elsewhere

- Native Microsoft Entra SSO

- Installed and operated by Hilo Tech

✓ Every access passes through your admin's permission matrix. An account disabled in Entra can no longer sign in; disabled in HiloIntelligence, it loses access on its very next request.
